

SF 224/235

Introducing the new ISEKI SF range of out-front rotary mower-collectors.

Offered with a 22 or 32.5hp engines and a choice of cutting decks measuring 1370 or 1525mm wide, these high performance out-front rotary mower-collectors are designed to facilitate grass cutting in the most difficult areas.

Height of cut can easily be adjusted from 25-120mm without use of tools, using the single height adjustment lever.

An impressive 950 litre, turbine driven, high-tip collector boosts efficiency when collecting grass. Its clearance height of 2125mm provides superior access when depositing the cut grass into waste skips, collector trucks or bins.

Routine servicing and maintenance is refreshingly easy with excellent access to the engine, radiator and service points.
